Jake Vasilakes

Place and Date of Birth: U.S.A. July 23, 1991
Address: 23 Humberstone Road, Cambridge, United Kingdom CB4 1JD
Mail: jvasilakes@gmail.com • Phone: +44 7572356508
Homepage: jvasilakes.github.io • Github: github.com/jvasilakes

Interests: Natural Language Understanding esp. semantic parsing, computational semantics, automatic speech recognition, QA systems.

Experience

Feb 2016 - Present | **Research Assistant in Speech Processing**
University of Cambridge - Cambridge, UK
State of the art speech processing systems for the Babel project

- Building state of the art ASR systems for 7+ languages using HTK.
- Implemented pipelines for building language models from web and morphologically decomposed data.

Sept - Nov 2015 | **Algorithm Development Intern**
ICAN Future Star Ltd - Edinburgh, UK
Development of a machine learning system for assisting students with university applications

- Formulated a supervised machine learning system for computing how well a given student matches a university given their academic qualifications.
- Designed a system for assisting student in the university application process by clustering students and modeling the per-cluster application process.
- Assisted in writing an ultimately successful grant for funding.

Education

August 2015 | **MSc Speech and Language Processing (Distinction)**
University of Edinburgh

Thesis: *Automatic Generation of Wide-scale Semantic Representations in NLTK*
Advisor: Ewan Klein

Exams and marks:

- Advanced Natural Language Processing 77
- Speech Processing 78
- Statistics and Methodology using R 58
- Natural Language Understanding 80
- Automated Reasoning 70
- Topics in Natural Language Processing 79
- Introductory Applied Machine Learning 73
- Phonology & Phonetics 71
- Automatic Speech Recognition 77
- Machine Translation 70
- Semantic Web Systems 83

June 2013 | **B.A. Philosophy (Honors)**
Loyola University of Chicago

GPA: 3.84/4.00 (Equivalent to UK first)
Minors: Classics, Italian
Thesis: *The World of Speech* Advisor: Hanne Jacobs
Honors and Awards: Outstanding Philosophy Senior Award 2013, 2^{nd} place Ancient Greek Translation Contest 2012, Member - Eta Sigma Phi Classical studies honor society

Skills

Programming Languages and Software

Python: Very good knowledge. Python 2 & 3, PEP 8 coding standards, unit-testing, numpy.
R: General knowledge (core aspects of the language, applications to machine learning).
C/C++: General knowledge (core aspects of the languages).
Regular Expressions: Good knowledge.
Bash shell scripting: Good knowledge.

Operating Systems: Linux/UNIX (including OS X), Windows XP - 8.
Software: NLTK, HTK, WEKA, Festival TTS software, Praat, Wavesurfer, Audacity, MS Office suite.
Version Control: Git.
Web technologies: HTML, CSS, XML (utilisation with Python), CGI (Python).
Ontologies: RDF, OWL, SPARQL.

Concepts

Natural Language Processing and Speech Technology:
- Automatic speech recognition (HMM/{GMM, DNN} systems)
- Language modelling (n-grams, neural networks).
- Syntactic parsing (constituent, dependency, CCG).
- Computational semantics (semantic parsing, formal and distributional semantics).
- Statistical machine translation (alignment models, decoding).

Machine Learning and Statistical Modelling:
- Generative and discriminative modelling.
- Supervised and unsupervised methods.
- Dimensionality reduction, feature selection.

Languages

English (native), Italian (conversational), some knowledge of German and Spanish, also 4 years study of Ancient Greek.
